DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I: The specifics being a liquid crystal display panel featuring a reflecting layer and three adhesive layers, one of the adhesive layers being a diffusion adhesive layer as depicted in Figure 1 and having the polarizer and optical retardation films mounted with respect to the same first substrate as proposed in claims 1-6.

Species II: The specifics being a liquid crystal display panel featuring two optical retardation plates and a polarizer having particular orientation axes and ranges for retardation levels as depicted in Figure 7 and having the polarizer and optical retardation films mounted with respect to opposite substrates as proposed in claims 7-9.

Independent claims 1 and 4 disclose embodiments having an arrangement of components which is mutually exclusive with the arrangement of components in the embodiment disclosed in claim 7, thus making restriction proper on the basis of clearly distinct inventions having distinct general inventive concepts.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 2871

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: NONE.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
